The Dennis Wire and Iron Co.

METAL WORKERS AND DESIGNERS.

MANUFACTURERS OF

ARCHITECTURAL  ORNAMENTAL IRON  WIRE WORK,
ART METAL WORK,
WIRE AND IRON SPECIALTIES.

Illustrated Catalogue No. 7.

OFFICE AND WORKS:

211 - 213 KING STREET, LONDON, CANADA.

JULY 1st, 1900.

London, Ont.:
LONDON PRINTING AND LITHO. CO.

1900.

Introductory.

WE submit the succeeding pages for the careful consideration of the trade, trusting that in the assortment of patterns and designs represented, and data given, our catalogue will be of real value and material assistance to them in selecting goods to fully meet their requirements.

We manufacture only the best grades of work, and guarantee our goods to be as represented; we believe that the best is always the cheapest.

Our customers will kindly bear in mind that much of our work has to be made specially to their order, and that it takes a little time to get the work in hand and constructed, but we will constantly direct our best efforts to make the delay as short as possible, while maintaining a high standard of workmanship.

For important work we are always prepared to supplement the designs shown herein, with special original sketches and photographs, and to furnish any assistance or information not contained in our catalogue. "Ask us questions."

Please destroy previous catalogues and price lists; they are of no value.

Quotations and tenders are subject to immediate acceptance.

Prices and discounts subject to change with or without notice.

Contracts made or orders taken by selling agents are subject to the acceptance and approval of the firm.

Claims not allowed unless made immediately on receipt of goods.

Iron Stairs.

WE can meet almost any demand made upon us for Iron Stairs—from the plainest and cheapest to the most elaborate. Architects and building superintendents, under-whose supervision we have erected Iron Stairways, pronounce them, invariably, to be very superior work.

No. 5. Ornamental Circular Stair.

In writing for estimates, give rise from floor to floor. Diameter is usually 5 feet. Baluster railing is wrought iron; treads and risers, cast iron. Various styles of railing can be substituted. It is not necessary to start with three straight steps; this is done to start stairway at proper place.

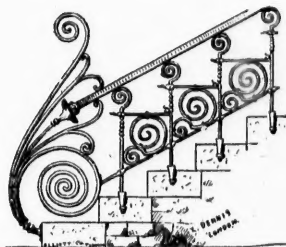

No. 1. Circular Stair.

(Showing portion of Balcony and Brackets.)

This illustration shows Stair as used on exterior of building.

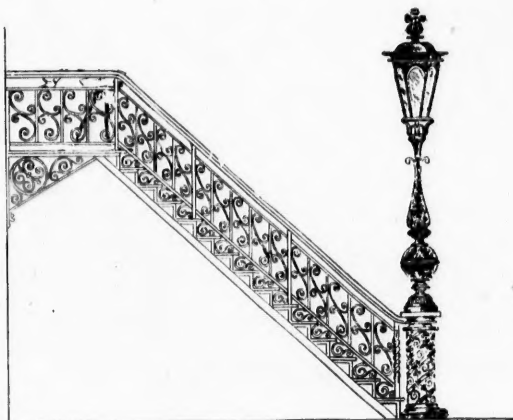

Estimates furnished promptly for any kind or quantity.

R.D.

No. 2. Iron Stair.

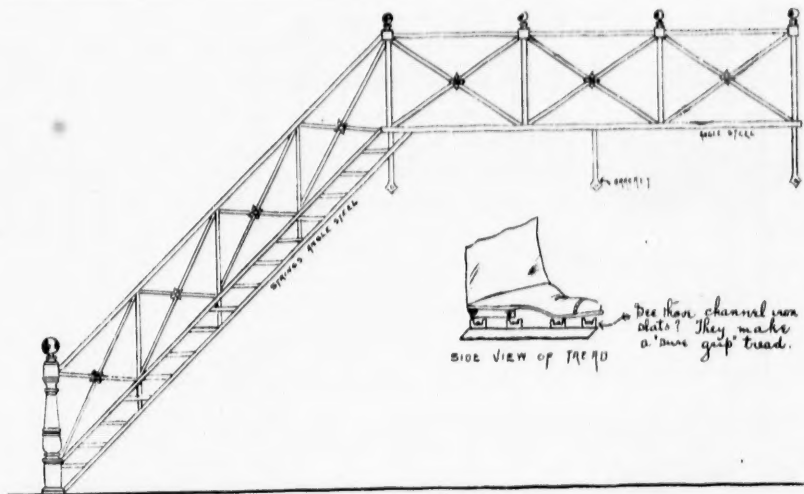

An attractive design for newel and railing for Wood or Stone Steps. We furnish Wrought or Cast Iron Steps when required.

No. 4. Iron Stair.

Modern in every respect, and an ornament to any building. The electric lamp can be omitted from newel if desired. Different designs of railing can be substituted.

Other styles made.

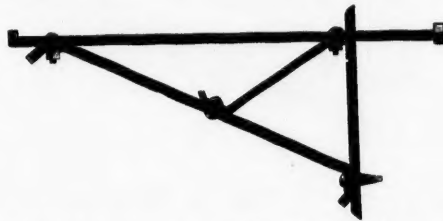

No. 3. Iron Stair and Balcony — Fire Escape.

Balcony, 3 ft. wide, (including Flooring, Railing and Brackets complete) per lineal foot.....	\$4.00
Stairway, 30 in. wide, complete.....	4.00

Our method of construction of Stairway and Balcony Fire Escapes combines strength, lightness, safety and minimum cost. The frame of Balcony is made of angle steel; flooring of channel steel or extra heavy steel wire netting. Strings of stairs, angle steel; treads, channel steel. Handrails, iron pipe; angle iron uprights. Brackets securely bolted through walls. In ordering or asking estimates, state length and number of Balconies and Stairs wanted, height from sill to sill, and thickness of walls.

We have had an extensive experience in building and designing Fire Escapes for all kinds of buildings and institutions, and are prepared at any time to send a competent man to advise, give necessary information, and submit sketch and estimates.

Wrought Iron Bracket for Balconies.

For 30-inch Balcony	each \$3.75
For 36-inch Balcony	each 4.25
For 42-inch Balcony	each 4.75

**Fire Escape. No. 4.**

This is a practical and serviceable escape that can be erected at a very reasonable figure.

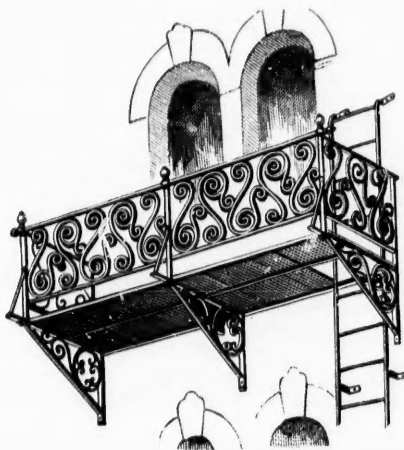

The ladder is so constructed that a person descending is between the wall and the ladder; the wall being at his back, the ladder in front of him, he can fall neither backwards or forwards. Thus they are perfectly safe.

Balcony, 4 ft. 6 in. long (to cover ordinary window),
each \$16 00
Iron Ladders (including necessary braces and bolts to
attach to building), per ft..... 1 00

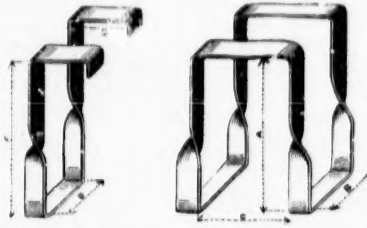

Price varies according to length of Ladder and number
of Balconies required.

When ordering be careful to send correct thickness of
wall.

This escape is intended for small hotels and factories
where there is no probability of a "rush" in case of fire.
We do not recommend it where a building is to be quickly
emptied of a large number of people.

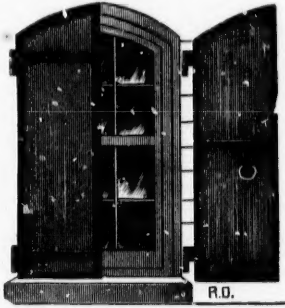

**No. 5. Ornamental Wrought Iron Balcony.**

Flooring is made of extra heavy steel wire netting, or, if desired, wood flooring
may be used.

No. 1—Single stirrup. No. 2—Double Stirrup.

In ordering give measurements indicated in cut. Usually made of $2 \times \frac{3}{8}$ or $2 \frac{1}{2} \times \frac{1}{2}$ iron.

No. 6. Iron Shutter.

Usually made with No. 14 sheet iron, or 12 when extra heavy door is necessary. Substantial wrought iron hinges and frame.

Price 80c. per square foot.

We can quote low figures for Bolts, Straps, Anchors, Columns, Steel Beams, Truss Rods, Etc.

Pew Ends.

Cast Iron Pew Ends possess so many self-evident points of advantage over the older wooden styles that they are rapidly displacing the latter. They have greater strength and durability, present a handsome appearance, and are capable of receiving a beautiful finish.

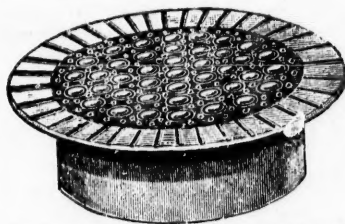

Price, each \$1.75

Price, Upper Half for divisions 1.00

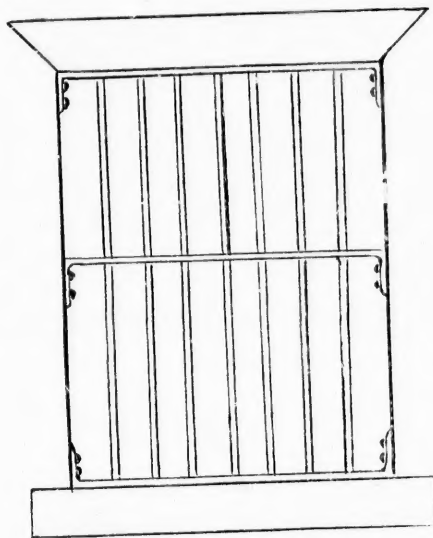

Discount on large orders.

Prices No. 20-C (as shown in cut). Cover only.	Cover and Thimble as shown.	Prices No. 21-C (Cover made ventilating instead of illuminating. Cover and Thimble. only.

Iron Roof Cresting and Finials.

FOR variety of patterns and for new and popular designs in IRON ROOF CRESTING we lead all others in the trade. We give best value and satisfaction. Our cresting is always properly fitted and painted before being shipped. No trouble is experienced in putting it up.

When Ordering Cresting

make a diagram of roof, allowing from two to four inches to set in from edge, and mark measurements directly upon the diagram. A FINIAL should be used at each angle or corner. When required for ridge we furnish any pattern with special feet to fit roll of ridge, for which we charge five cents per foot extra. Order by number, mention height desired, and color you want it painted.

Directions for Putting Up Cresting.

1	Place numbered pieces where shown	6
	on diagram furnished by us with cresting ; whole panels between will make	
2	up the length.	5
3		4

Every order shipped by us is accompanied with directions as shown above, so cresting can be set in position by anyone who can use a screw driver.

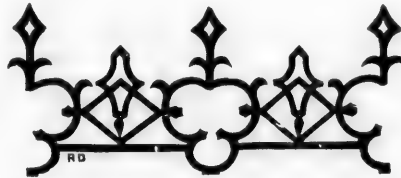

RUBBER STRIPS are furnished to be placed under each foot; this absolutely prevents any leakage of roof.

Corners and Finials are furnished with wrought iron clips. All necessary bolts and screws are included in the following prices :—

Roof Cresting.

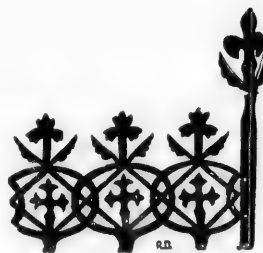

No. 1—Cresting, 10 in. high.....per lineal foot, 30c.
For low ridge.

No. 2—Cresting, 13 in. highper lineal foot, 30c.
For ridge.

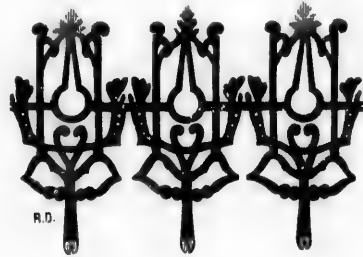

No. 2 1/2—Cresting, 14 in. high.....per lineal foot, 35c.
Designed for ridges.

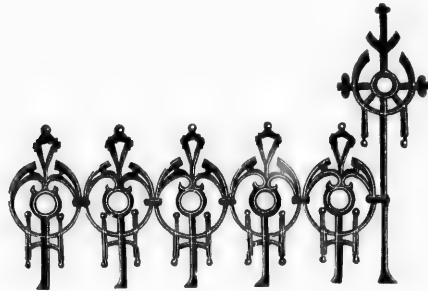

No. 3—Cresting, 12 in. high.....per lineal foot, 35c.
Angle Posts.....each, 35c.
A very pretty pattern for low bay windows and porches.

“Appearances Count.”

No. 4—15 in. high.....per lineal foot, 35c.
Japanese Pattern. A new design for bay windows, etc.

No. 5—14 in. high..... per lineal foot, 35c.
Finials (with wrought iron rods).....each, 60c.
Angle Posts, to correspond with Nos. 4 and 5..... each 35c.

No. 6—15 in. high.....per lineal foot, 35c.

"Appearances Count."

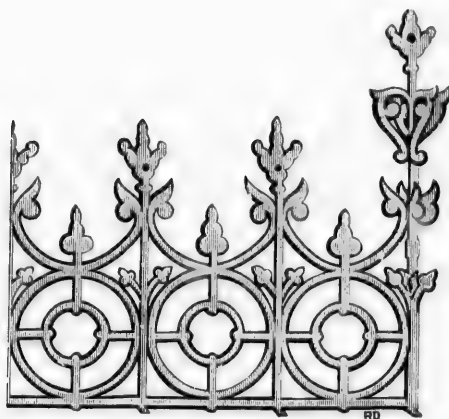

No. 7—Cresting, 15 in. high.....per lineal foot, 40c.

Price, per foot, iron painted, \$1.25 ; antique copper, \$2.00 ; brass, \$2.50.

Church Metal Work.

We design and build a complete line of ornamental brass work for church purposes. The illustrations of church metal work on this and succeeding pages are intended merely for suggestive data, to be supplemented by photographs and special sketches. We will arrange and submit designs on receipt of a description of work required and any suggestions and information that will enable us to prepare our designs agreeably with customer's taste and desired limit of expenditure. Our designs will be found artistic and appropriate, and our work executed with skill and fidelity.

We will give careful attention to enquiries for work for churches of moderate size, where something is required at a moderate expenditure. For smaller-sized churches we can furnish work of appropriate style and chaste design at very reasonable figures.

Brass Pulpit.

(OAK BASE.)

We also make pulpits with ornamental cast-iron platform, supported on cast-iron columns; brass railing.

DENNIS - LONDON

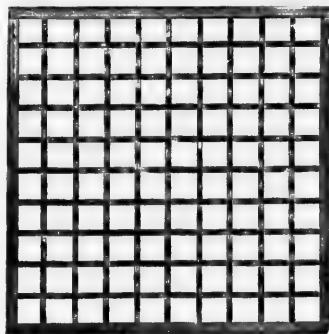

Design No. 103. Sign Grill.

This Grill is generally put in the transom or main entrance of banks, offices and stores, and answers the double purpose of a sign and ornamental protection for transoms. The face of letters is gilded with gold leaf and balance of work finished in black or oxidized copper. Other designs furnished.

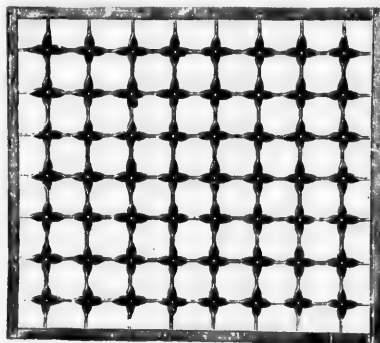

"DOES QUALITY COUNT WITH YOU?"

Metal Panels.

We illustrate a few designs of metal grills. These are made of flat rolled steel or brass, and set in channel steel or channel brass frames. They can be beautifully finished in polished brass, antique brass, bright copper, antique copper, bronze, nickel, dead black, steel blue, etc. These panels can be screwed in wood frames for counter railings, guards, partitions, etc., etc. They are also used with ornamental top rail and brass posts for bank and office railings.

Bank and Office Railings.

We manufacture a complete line of Wire and Metal Railings, Partitions, Wickets, etc., for banks and offices. We can meet all requirements in this department. Our metal railing work is of the highest grade. We can execute any design, and furnish any finish desired. For important work, we supplement the designs illustrated on the following pages with original sketches. We always have the very latest materials and methods to put into the construction of our work. Our metal railings are always correct in artistic design and style, of the most skilled workmanship, and finest finish.

We call particular attention to our Antique Copper Finish. This is a most durable one, and when properly and artistically applied (as by our improved electroplate process), presents a very handsome effect. Our method is in many ways superior to others—we produce finer work and a better style of finish.

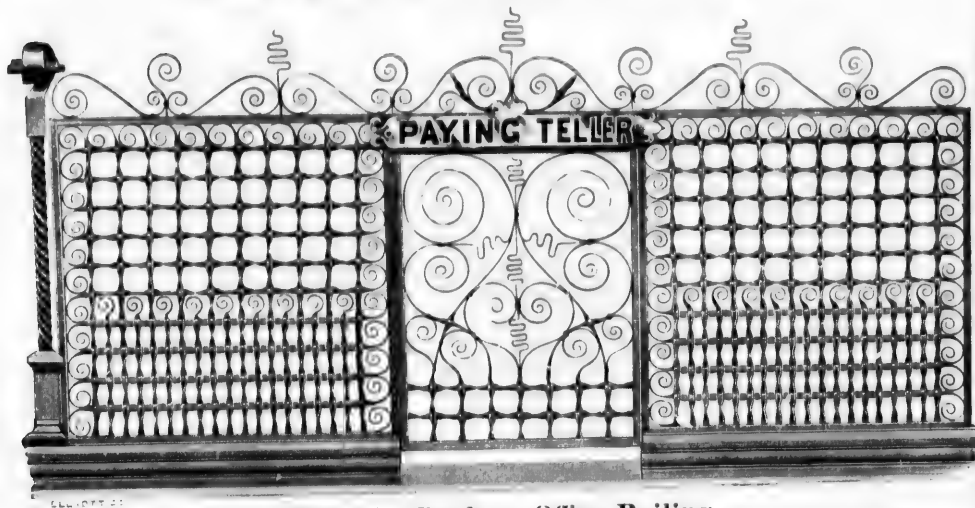

No. 100. Metal Bank or Office Railing.

Furnished in polished brass, antique brass, bronze, antique copper, nickel, dead black, etc.

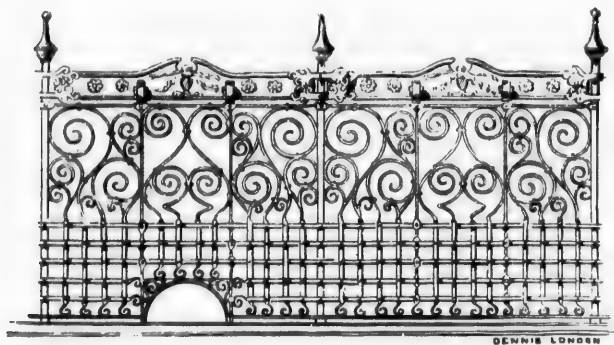

We will furnish estimates on receipt of plan of counter, measurements, etc.

"Does Quality Count with You?"

No. 101. Bank or Office Railing.

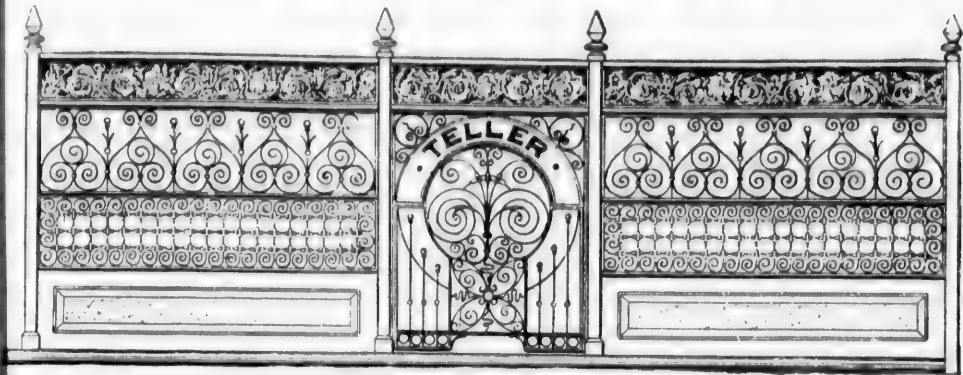

We design and make bank railings, cages, wickets, etc., to meet any requirement.

No. 103. Bank or Office Railing.

These railings furnished in polished brass, antique brass, bronze, antique copper, nickel, dead black, etc. We will furnish estimates on receipt of plan of counter, measurements, etc.

"Does Quality Count with You?"

No. 104. Bank or Office Railing.

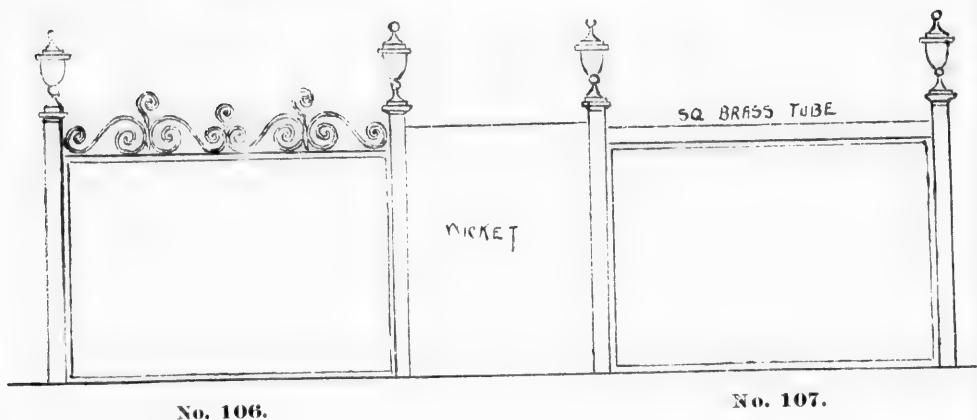

Base bevelled-edge plate glass, plain or chipped. Very handsome in polished brass.

No. 105. Bank or Office Railing.

Base bevelled-edge chipped plate glass. The railings furnished in polished brass, antique brass, bronze, antique copper, nickel, dead black, etc. We will estimate on receipt of plan of counter, measurements, etc.

"Does Quality Count with You?"

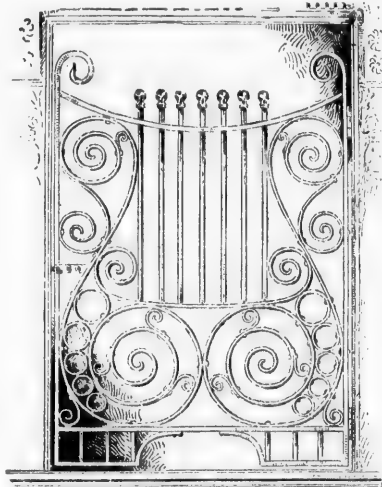

The above illustration shows framing, brass posts, ornamental top rail and wicket for bank or office railing. Any design of metal panels, as shown on pages 45 and 46, can be inserted in frame. Any style wicket may be used (see page 51). This construction makes a very handsome and serviceable railing for office or bank counter, at a reasonable cost. Send us a plan of counter, with measurements and number of posts and wickets required, and we will send estimate for work complete. This railing is usually made in antique copper or polished brass.

When you are requiring metal work of this nature, ask us about it. We have had much experience in designing and making metal railing work, and are always pleased to aid prospective purchasers with suggestions, special drawings, and any information we are able to give.

Tellers' Wickets.

For banks, ticket offices, post-office windows and cash openings. Made to order to fit any opening.

The artistic appearance, utility and durability of our brass wickets are making them very popular; they are each year coming more and more into use.

No. 5. Polished Brass Wicket.

18 in. wide, 24 in. high; each, \$25.00.

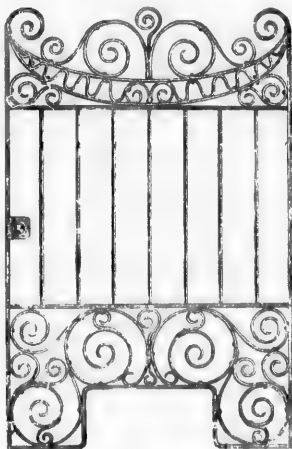

With lock and hinges.

No. 7. Polished Brass Wicket.

18 in. wide, 24 in. high; each, \$20.00.

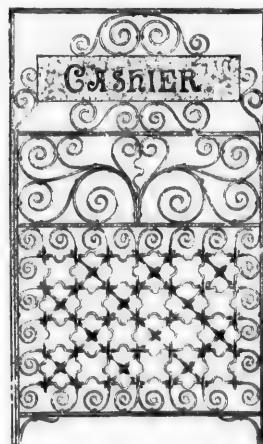

With lock and hinges.

No. 6. Polished Brass Wicket.

18 in. wide, 24 in. high; each, \$25.00.

With lock and hinges.

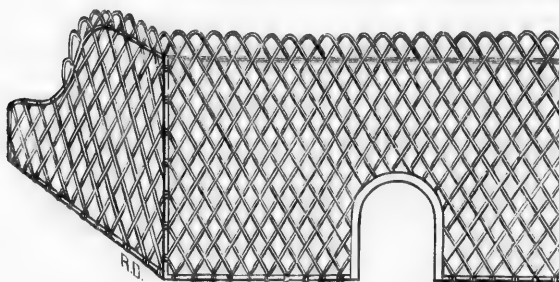

No. 8. Polished Brass Wicket.

18 in. wide, 24 in. high; each, \$32.00.

These wickets are usually made in polished brass, but can be furnished in antique copper if desired. They are used with our metal counter railings, and can also be used in connection with wood or glass railings, showing a handsome contrast.

Wire Office Railings.

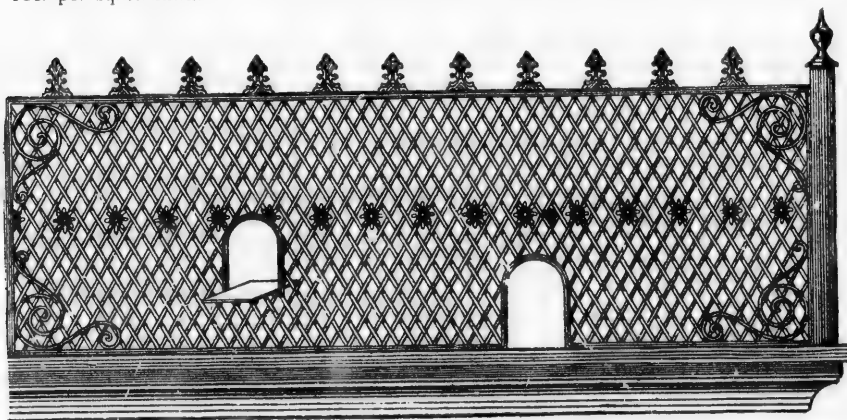

No. 1. Crimped Wire Railing.

This is a very serviceable, low-priced railing for store counters, desks and small offices. Frame is $\frac{3}{8}$ in. round iron, with $1\frac{1}{4}$ in. diamond mesh No. 11 wire.

A guard measuring less than 12 sq. ft., 25 per cent. advance. These guards are a great protection to the windows. They permit a free circulation of air in warm weather, and keep out animals, yet do not obstruct the light. The frame is of $\frac{1}{4}$ iron, covered with diamond mesh as shown in cut. Painted green or drab. These guards are made to be fixed with staples, but can be made with $\frac{3}{8}$ frame to screw on if required, costing 3c. per sq. ft. more.

Always state which measurement is the height.

**No. 1. Store Front Window Guard.**

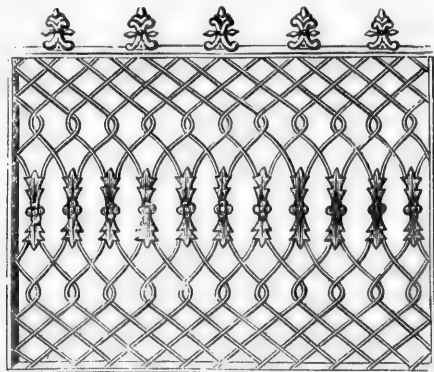

Frame, $\frac{5}{8}$ round iron ; No. 10 wire ; $1\frac{3}{4}$ mesh.

A strong, safe protection for store fronts.

Price per sq. ft., 25c.

Gates " 30c.

In ordering, send plan of store front, and be careful to give correct measurements.

**Round Iron Frame.**

This cut illustrates the method of securing the wires in wire guards and railings made with round iron frames. This style of frame can be secured in position with staples and screws.

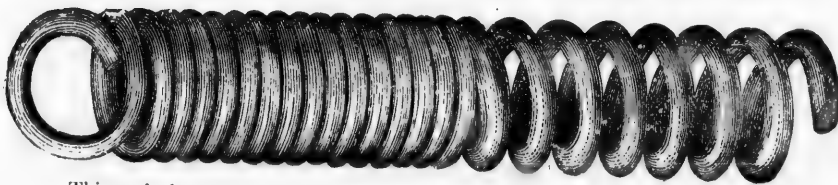

**Channel Iron Frame.**

This cut shows the method of securing the wires in channel iron frame, and is used in the better and stronger class of work, such as bank railings, elevator work, stall partitions, heavy window guards, etc.

Above are shown full sizes of iron and steel wire by English standard gauge.

Coil Springs.

This end shows close coil No. 9 wire, 1 in. diameter.

This end shows open coil No 7 wire.

We make all kinds of wire springs, and will be pleased to quote prices on receipt of specifications.

Flower Stands.

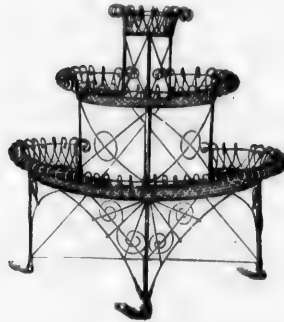

Wire flower stands possess many desirable features; though strong and almost indestructible, they are light and very easily handled. They are tastefully finished and decorated, and are in themselves a bright and attractive ornament; when filled with living flowers they make the room bright and beautiful.

24 in. high, 30 in. long, 9 in. wide.	Price, \$2.00
30 " 36 " 10 "	" 2.50
36 " 42 " 12 "	" 3.00

A very pretty little stand to hold a few choice plants.

NOTE.—Our Flower Stands are made extra strong, of heavier wire and more ornamental than ordinary makes. They are much admired for their beauty. We usually paint them green or wine color ; finished in gold bronze and mounted on casters. They can be securely packed and shipped anywhere as freight without injury.

Wire Grave Arch.

Name in gilt letters.

Very pretty at head or foot of grave.

No 1.—4 ft. 6 in. high, 2 ft. span...each, \$3.00

Letters 10c. each.

Wire Chairs and Settees.

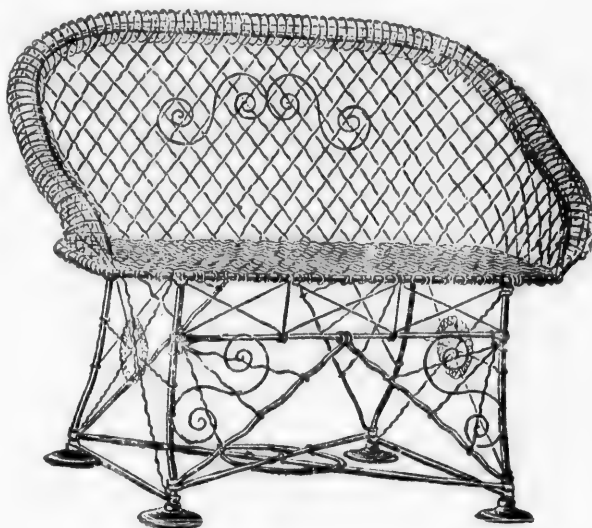

For Lawns and Cemeteries.

Wire Chairs..... Price, \$5.00

Wire chairs and settees are comfortable, ornamental, and strong. We paint them green, white or black. They can remain out of doors during all seasons of the year without injury.

Wire Settees, to seat three persons.. \$10.00
 " " four " .. 12.00

Wire settees are light and convenient to handle, and more attractive, as well as more comfortable, than cast iron or wood. They are "just the thing" for piazzas, lawns and cemeteries, and will last a lifetime.

Coal and Sand Screens.

These screens are made with heavy hardwood frames, and filled with crimped steel wire web, which is firmly attached to the framework, and secured with flat iron at top and bottom. Cross rods are across the back of the screen to prevent wire from sagging.

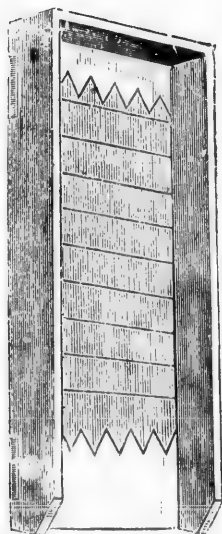

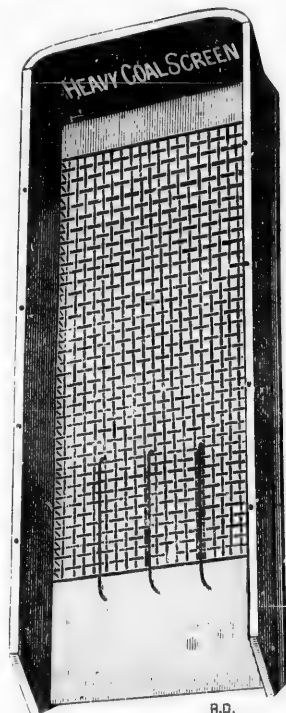

No. 1. Coal Screen.

Size, 7 ft. x 34 in. each, \$8.00

The different meshes are generally used as follows :

For Chestnut Coal, $\frac{3}{8}$ in. space between wires.

" Nut	" $\frac{1}{2}$ and $\frac{5}{8}$ space	"
" Stove	" $\frac{3}{4}$	"
" Soft	" $\frac{7}{8}$ and $\frac{1}{2}$	"

No. 2. Mason's Sand Screen.

Size, 6 ft. x 2 ft. 6 in. each, \$5.00

Our Sand Screens are made of *Crimped* wire; there are no fine wires to cut, so that screen cannot get out of order until completely worn out.

Steel Wire Signs.

"If you have not a good sign, 'tis not a good sign for you."

The object of a sign is, primarily, to direct attention to one's place of business. For this purpose a **Wire Sign** is by all odds the most effective: it can be seen and read farther than any other; it can be read from both sides; by the addition of artistic scroll work a wire sign can be made a handsome ornament and finish to any building: it lasts longer than any other; and last, but not least, it creates a good impression—it indicates progress, good taste and enterprise.

CONSTRUCTION.

Frames, channel steel; heavy steel wire mesh. Letters galvanized iron, painted black, or hard wood finished in gold leaf. Necessary braces, etc., and ornaments and scroll work as desired.

Send us length and height of sign required, with any other information that will be of assistance to us, and we will furnish special original designs and estimates free of charge.

**Wire Banner Sign.****Wire Signs.**

This makes a very attractive sign to hang from front of building, or to suspend across street, and can be read at a long distance.

2½x3 ft., with letters.....	\$ 7.00
3x4 " "	8.50
4x5 " "	11.00
5x6 " "	14.00

7x8 " "	25.00

Ornamental Metal Sign.

Lettered as desired.

We make a large variety of artistic metal signs, and will make special sketches and quote prices on receipt of particulars.

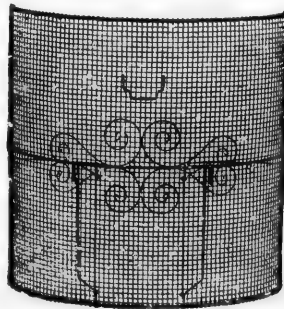

Bank and Office Window Blinds.

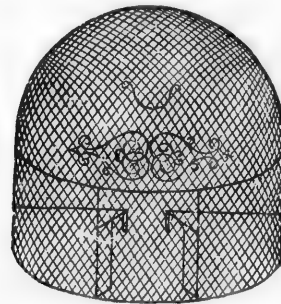

The advantage of these screens is that persons inside a room can see out without any difficulty, while those from the street cannot look in, and you are thus secluded from the gaze of outsiders. Lettered with Gold Leaf. Send size of frame and lettering required, and we will be pleased to quote prices.

All our Spark Guards are made of 6x6 mesh wire cloth, and will fit the grate closely. The styles A and B stand on the hearth inside fender. Those made like cuts C and D hook on to the grate bars, and do not come down to the hearth. When ordering, give trade number, stating whether brass or japanned, and, if special, give width, height, and depth, specifying the style of guard, A, B, C or D. All orders for special guards should be accompanied by full size paper templates.
